To whom it may concern:

In 2004, our jewelry store was in need of a major updating. After several attempts at doing it ourselves, we decided we needed a professional. We visited with several, but none of them seemed to be what we were looking for.

Eventually, we reached Herb Schottland of Store Design and Fixturing. He came and looked at our situation and submitted a proposal.

We adopted the design and have been extremely happy with it. Our store is 20 feet wide and 70 feet deep, which has always been difficult for us make good use of. Herb was able to almost double our display space with his unique design. It was finished in the fall of 2005 and still looks great. More importantly, it works wonderfully.

We here at Overstreet's Jewelry are very happy to recommend Herb Schottland for any redesign that needs to be done.

Sincerely,

Don Overstreet  
President
